Digital Media Developers Group
May 6, 2004 Meeting Notes

Old Business

ITAB Report—Kevin Lanahan, MDI

- E-mail consolidation continues.
- MOTEC is being used to capacity. They may be moving at some point to reduce leasing costs.
- Accessibility standards are getting scrutinized for IT contracts.

DMD Web Conference Recap—Kirk Keller (MDC)

- 111 attendees from over 20 agencies.
- Saw some good discussion between sessions
- Suggested making this a biennial event or coordinating it with the Digital Government Conference.

Source Code Repository—Dave Beard (OA-SDC)

- The source code repository is available at http://moforge.oa.intra.mo.gov/ . It requires the users to get an ID and password if they want to make changes to the code, but anyone can download a project from the site.
- We will be glad to take any new source code contributions from DMD members.

New Business

Digital Archiving

Jason Stirnaman—The State Library will begin archiving digital state publications, including some web content, and provide enhanced access to archived and "live" versions.

Part of the process will involve a solution for agencies to submit or notify the State Library of new publications.

Kirk Keller, Debbie Boeckman, Kay Dinolfo, Jason Stirnaman and Larry Murphy will meet to explore how a notification solution and/or unique identifiers can be implemented on web projects.

Agency Projects/Open Discussion:

The Gaming Commission has joined the newsfeed project and launched a newsfeed.

Kirk Keller has nominated the newsfeed group for a Governor's Award for Quality and Productivity.

The DMD has been contacted by HiSoftware, creators of Cynthia Says. They have a

desktop version of Cynthia Says available at http://www.hisoftware.com/ .
